Subject: RE: Letter from the Environmental Technology Council, Re; Tradebe site in Indiana

Hi Gary –

Thank you for passing along this information. I trust you received the relevant information that Ruth Jean sent to Jae Lee last week.

We are in the process of reviewing Tradebe's permit renewal application, and intend to move forward with a permit decision. If EPA determines that SDS units require a RCRA permit for operation, we will require Tradebe to submit a Class 3 permit modification at that time.

Regards, Vic

Hi Vic—

Based on the expiration date of the RCRA permit for the Tradebe site in East Chicago, I am thinking that IDEM might be in the process of considering the renewal of that permit.

Please find attached a letter that EPA Headquarters has received from the Environmental Technology Council regarding potential different regulatory interpretations in different states regarding sites like this.

EPA HQs is looking into the matter at this time, and will be involving R5 in their discussions. I will keep you posted; please keep me posted if you decide to go forward with a renewal at this time.

Thanks.

Gary Victorine, Chief
 RCRA Branch
